PRESENTATION REMOTE WITH GREEN LASER, AND 100' RANGE

- Green laser appears 10x brighter than red lasers
- Freely navigate the room and interact with your audience
 - Plug and present: no software necessary

Model
VP4450

**PRESENT WITH
 CONFIDENCE**

**All Buttons
 Programmable**

Works right out of the box. A downloadable utility allows custom programming of the receiver. Once programmed, the customized keys are available in any program on both Mac and PC computers without any software or drivers.

Auto RF™ Port

Simply insert the receiver into the Auto RF port once to complete setup. It finds a clear communications channel and adjusts automatically.

The RemotePoint Emerald Navigator offers a bright green laser pointer and presentation controls at ranges up to 100 feet.

In addition to dedicated presentation controls for Mac and PC, all of the buttons on RemotePoint Emerald Navigator can be customized to send a variety of key combinations.

Emerald Navigator simplifies setup by using Auto RF, a frequency agile protocol to ensure reliable communication in today's electronically noisy environments.

The Emerald Navigator comes with a carrying case and has a slot for adding a lanyard.
