#### **Remote Network Operation**

When connected to a Local Area Network (LAN) by means of the RJ-45 connector,

the projector can be controlled remotely through a Web browser or by any of the clients (PCs connected to the LAN) on the LAN. The projector can also be accessed outside the LAN, provided a firewall is configured accordingly.

# PC for Remote Projector

## Using a Static IP Address

Set the IP Setting to **Static IP Address** if you want the projector to have a **permanent** IP address.

The following screens may vary depending on the operating system you are using.

 From the Local Area Connection Properties window, open the Internet Protocol (TCP/IP) Properties window.

3. Set the Subnet mask: 255.0.0.0 0 Datain an IP address: IP address: D . 0 . 50 Subnet mask: D . 0 . 50 Default gateway: O Datain DNS server address automatically O Use the following DNS server addresses:	Set the IP address: 10.0.50.99	Internet Protocol (TCP/IP) Properties General You can get IP settings assigned automatically if your network supports this capability. Otherwise, you need to ask your network administrator for the appropriate IP settings.
O D_tain DNS server address automatically	Set the Subnet mask: 255.0.0.0	○ Dbtain an IP address automatically         ○ Use the following IP address:         IP address:         Subnet mask:         255.0.0.0         Default gateway:
Preferred DNS server:     .       Alternate DNS server:     .		Obtain DNS server address automatically     Otsg the following DNS server addresses:     Preferred DNS server:     Alternate DNS server:

4. Click OK.

# **5.** To prevent

messages being filtered

between the remote

PC and the projector, disable the proxy server in your Web browser.

From the Internet Options window, click LAN Settings...

 In the Local Area Network (LAN) Settings window, make sure the Proxy server check box is not checked. Click OK.

#### The Remote Interface Overview

The following shows the remote interface main screens.

#### Remote

This screen shows the current status of the projector.

## Remote-2

This screen is used to control the projector.

Remole Remole-2	Remote-2 Auto Image 🖾 Source Select : 🚾 😨 🖾					
Administrate- Setting P. Setting						
- Caning	(REMOTE Commands)					
E-Mail-Setting	UP Set	DOWN	LEFT 🐼	RIGHT 🚾

	FREEZE BM	VOLUME+ 🖾	VOLUME: 🖾	Enter Ett		

## Administrator Settings

This screen allows the administrator to set a password and limit connections to the projector.

Remote-2 Administrate-Setting IP-Setting E-Mail-Setting

Remote

## IP Settings

This screen allows the IP address to be set for static or DHCP.

he IP		IP-Setting	
r static	Remote		
	Remote-2	IP address STAT	Έ: ● Static IP address ● DHCP address
	Administrate-		
	Setting	IP Address	10.0.50.100
	IP-Setting	Subnet Mask	255.0.0.0
		Default Gateway	0.0.0.0
	E-Mail-Setting	DNS Server	0.0.0.0
		Set Restart	

#### E-mail Settings

Status messages for the Projector can be emailed to the administrator or any other address.

Some servers require a sender address, otherwise the email is blocked. So in most cases the **Sender** and **Receiver** addresses will be the same.

The projector automatically emails status messages, such as IP address, and Power state as shown below to the **Receiver** address. The projector cannot receive e-mails.

# Remote-2

Administrate-Setting IP-Setting E-Mail-Setting

Sender E-Mail address	senduser@meil.compeny.com
Receiver E-Mail addres	a recruser@mail.company.com
Mail Server	172.16.1.52
Mail Server My mail server request	17216152
The second se	20/10
(Sender) E-Mail Userna	me

#### **Setting up Remote Operation**

You should know some or all of the following address settings:

- IP Address
- Subnet Mask
- Default Gateway
- DNS Server
- E-mail addresss for remote PC
- Password (if required) for remote PC
- Outgoing server (SMTP) for remote PC

#### Important:

Using a proxy server for your LAN may filter messages from the projector. Disable the proxy server to prevent this.

The factory default IP address for the projector is **DHCP on**. If this address has been changed, you can find the current IP address in the OSD Status of the projector.

#### Using the DHCP Address Settings

Set the IP Setting to DHCP if you are using a DHCP server that will assign an IP address to the projector.

1_	Enter the address of	ter the address of		IP-Setting	
••	the projector in the	<u>Remote</u>			
	address bar of	Remote-2	IP address STAT	E: ● Static IP address ● DHCP addre	
	your browser:	Administrate-
