ASK Proxima

ASK, founded in 1984, originally conducted R&D in LCD technology for the production of LCD screens but later turned its focus towards developing overhead panels for projecting images in larger formats.

In 1991, Tandberg Data, a world leader in data storage products, assumed ownership of the firm, which rejuvenates ASK by turning its target to projector manufacture by collaborating with Polaroid under the label "For Polaroid - By ASK". The company undertook an aggressive marketing campaign, building a network of distributors in countries all over Europe and Asia.

In 1998, to expand the market, ASK acquired its American competitor, Proxima Corporation. Later the company changed its name to Proxima ASA in 2000, and as of 2005, the company was the second largest in the projector industry. The year after, the company merged with the industry leader, InFocus Corporation.

In 2010, ASK Proxima went through another round of re-structuring and started to implement a new strategy to compete in the world market.

360° Lens Shift

Lens shift function—maximum 50% vertical shift and maximum 10% horizontal shift enables flexible installation.

1.6x Standard Digital Zoom Lens

Comparing with 1.2x lens, 1.6x lens can meet various installation requirements.

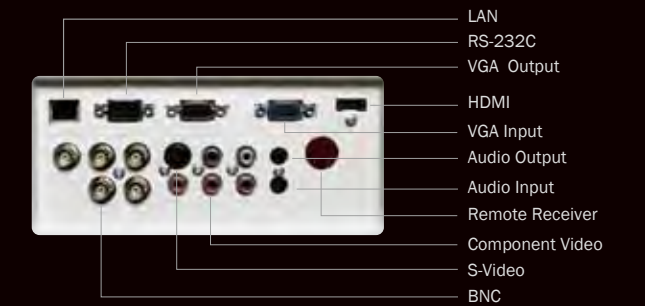

High Brightness for Large Image

Ultra high brightness is suitable for large venues, conference rooms and exhibition display.

Multiple I/O Interface

Various I/O interface support multi-format peripherals.

Motorized Lens Shift & Digital Zoom

Motorized lens shift can adjust image position without moving the projector.

Centred Lens Design

Centered lens design enables easy installation and quick calibration from the projector to the screen.

Hybrid Filter

The projector uses highly reliable filter. It can be used for a long duration of time which saves a great deal of maintenance.

Inorganic LCD Panels

BrightEra

"BrightEra" chips help to reduce light leakage, elevate contrast ratio, improve LCD panel's light resistance and strengthen its stability.

Super Cooling Protection

Dual-path cooling design extends projectors' life.

Network Control

By wired connection to RJ45, the user can control or monitor all projectors in distance by on/off, configuration, viewing lamp time and operating status by entering corresponding IP through internet browser.
