## More Features

### • 3D pass-through technology

Connecting a 3D-compliant Blu-ray disc player and 3D-compliant TV to the AVR-3312CI creates a 3D home theater where you can enjoy high-definition sound and video like never before.

### • Minimum Signal Path for clear audio and video signal

Denon's "simple and straight" design concept has been thoroughly implemented in the signal paths to provide incredibly clean audio and video playback. Signal paths are as short as possible to keep signal degradation in the audio and video circuitry to an absolute minimum.

### • Direct Mechanical Ground Construction for thorough vibration resistance

Vibration-resistant construction thoroughly suppresses the adverse influences of vibration on sound quality. Power transformers have been securely mounted on the receiver's highly rigid bottom chassis to minimize vibration. By direct mounting feet to the radiator in close proximity to each other, we are able to suppress the mutual vibration from the power transformers and other sources.

### • Compressed Audio Restorer for enhancing digital music files

Denon's audio technology for MP3, WMA and AAC compressed formats restores the higher frequency range that is lost during the compression process. This technology delivers superior performance with more emotional range and nuances from any connected source that uses compression.

### • Picture Adjust

You can adjust the picture quality for each video source. (Contrast, Brightness, Chroma level, Hue, Reduce overall picture noise, Emphasize picture contours)

## Connectivity & Expandability

### • 3 source / 3 zone output

The AVR-3312CI lets you enjoy a program source in the Main Zone (the room where the AVR-3312CI is located) and in 2 other rooms. The source can be the same for all zones, or you can enjoy 3 different sources in those zones if you prefer. The Denon Remote App controls all the zones from anywhere in the home making multi-room audio so much easier to enjoy.
