The World's First *Interactive* Projector

Introducing the BOXLIGHT ProjectoWrite2

The first interactive presentation solution built in a stand-alone unit.

Simply plug the ProjectoWrite2 into a computer source, save the software, respond to a simple 13 point calibration and you're ready to interact.

"A revolutionary instructional and educational tool."
www.Projector.com

"Best thing I've seen in 22 years of selling AV equipment."
Jon Morris–NCECS

The ProjectoWrite2 is an upgrade to the award-winning ProjectoWrite. Give presentations while taking notes on screen, or highlight key points in real time. Control the line thickness and color, take handwritten notes, type text from a keyboard then save as an image file. The ProjectoWrite2 comes with a lightpen and writing wand-just plug it in and present.

How does it work?

A color camera with I/R filter mounted on the projector allows for interaction with the wand and light pen.

What can you do with it?

- Write notes, circle key points, type changes
- Manipulate text, data and images
- Capture, modify, save or email anything on the screen as an image file
- Access and browse the internet
- Moves from screen to screen without losing interactivity
- Capture the audience attention by interacting with the image

Who can use it?

Anyone who wants to interact with a screen:

Teachers, school administration

Defense contractors, military

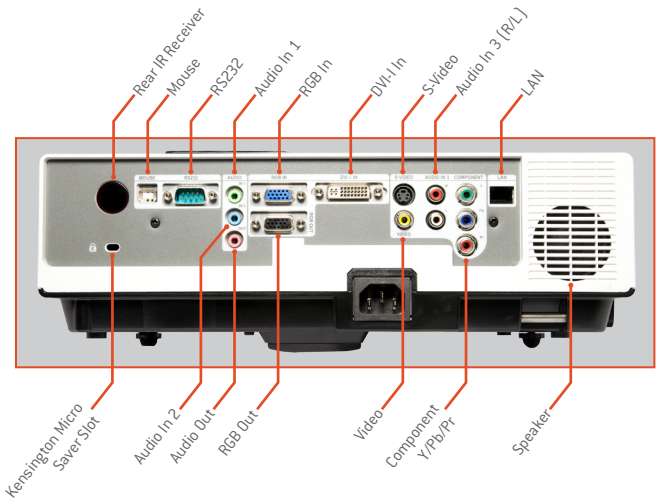
Business people and professional trainers in any industry

Attorneys, law enforcement officials

Athletic coaches

Easy to set up and use.

Simply plug the ProjectoWrite2 into a computer source, save the software, respond to a straightforward 13 point calibration and you're ready to interact.



Affordability

Costs 50% less than traditional interactive whiteboards. Only one piece of equipment to purchase.

Simplicity

No installation necessary. Portable, or can be retrofit into existing projector installations.

Flexibility

No screen necessary. Turn any flat surface into an interactive surface. Allows for large and flexible screen sizes. Also available in a short throw, widescreen, and ultra-short throw model.

Compatibility

Works with virtually all interactive software. Write on the screen, use mouse control, type text from an on-screen keyboard, and save notes and edits for future use.

BOXLIGHT
ProjectoWrite2

Outstanding Technical Support
