

NSATA-C

Non-Stock ATA Shipping Case

JELCO® Non-Stock ATA Cases are build-to-order shipping cases custom-designed to fit a specific size projector and basic accessories (cords, cables, remote, etc.)

These rugged shipping cases are constructed of high impact gray ABS plastic laminated over a wood frame. Steel corners, aluminum trim, inter-locking valence and stainless steel rivets produce an ultra-strong case that will give years of service.

Each NSATA shipping case is fully lined with 1-1/2 inches of firm industrial grade foam, custom designed to fit your specific projector model. Tilt wheels with 3-stage locking extension handle and combination lock come standard.

A generous-sized accessory compartment holds the cords, cables, and remote control, as well as other needed items.
