

WPS PRO

ROBUST SCREEN SHARING AND COLLABORATION

POWERFUL WIRELESS PRESENTATIONS

-  **4-way split-screen** allows 4 participants to share content simultaneously
-  **Supports up to a maximum of 64 concurrent users** for ultimate collaboration
-  **Complete moderator control** via the extensive web management interface
-  **Screen Mirror with Windows PCs and Mac computers** enables sharing of the presenter's desktop across screens
-  **Share content using Windows PCs, Mac**
-  **Webslides feature** enables remote viewing of the presentation session

The WPS Pro is a fully-equipped presentation solution with a robust library of features that enables up to 64 participants to share content via 4-way split screen in a corporate or educational environment. WPS Pro connects to any HDMI or VGA-enabled Optoma Projector to deliver big, beautiful, and crisp presentations while the Conference Control function allows the moderator complete control of the presentation session.

Users can share PowerPoint Presentations, Word Documents, Excel Spreadsheets, videos and images directly from a SmartPhone or Tablet via the MirrorOp Presenter App for iOS and Android. WPS IPRO2 software enables Windows and Mac users to Mirror the Desktop to share any application including the web browser with session attendees.

In addition to sharing content, the moderator or any of the 4-way split screen participants can utilize the Annotations feature of the MirrorOp Presenter iOS and Android App. The Annotations feature allows the presenter and any of the 4-way split-screen participants to collaborate in real-time during the presentation session with the ability to write and draw using various colors and shapes.
