

Owner's Manual

Network Set-up and Operation

Wired Setting Projector Set-up and Operation

This is the manual for the Network function. Read this manual thoroughly to operate the Network function. First, read the owner's manual of the projector to understand the basic operation of the projector and the safety instructions. The safety instructions in the owner's manuals should be followed strictly.

Federal Communications Commission Notice

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment causes harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

CAUTION IN USING THE PROJECTOR VIA NETWORKS

- When you find a problem with the projector, remove the power cable immediately and inspect the unit. Using the projector with failure may cause fire or other accidents.
- If you remotely use the projector via networks, carry out a safety check regularly and take particular care to its environment. Incorrect installation may cause fire or other accidents.

CAUTION IN USING NETWORK FUNCTION

• We assume no responsibility for the loss or damage of data, or damage of the computer caused by using this projector. Making back-up copies of valuable data in your computer is recommended.

Chapter 1 Preparation

Describes features and operating environment of this projector.

Features

Web Management function (PP.31)

With this function, you can monitor projector functions such as power status, lamp status, input mode, signal condition, lamp-use time, etc. through the network by using the web browser installed on your computer.

E-Mail Alert function (187 p.25)

The projector sends messages to the registered e-mail addresses when a lamp abnormality or power failure occurs with the projector. This message describes how to solve the cause of the problems. You can take efficient action for quick recovery.

Required operating environment for computers

When operating the projector via networks, computers should meet the operating environment below.

| Operating SystemWindows 2000, Windows XP (32bit version), Windows Vista (32bit version), Windows 7 (32bit version) Mac OS X v 10.4 or 10.5 | | Windows Vista (32bit version), Windows 7 (32bit version) | | |
|---|---------------------------|--|--|--|
| | | Windows: Pentium III 900MHz or more Macintosh : 800 MHz PowerPC G4 or faster,or 1.8 GHz Intel Core Processor or faster | | |
| Memory Windows : 64MB (Minimum)/ 128MB or more (Recommendation 128MB or more for Windows XP 1GB or more for Windows Vista or Windows 7 Macintosh : 256MB or more (512MB is recommended) Free disk space 100MB or more Drive equipment CD-ROM drive Display settings Support one of following resolutions; VGA (640 x 480), SVGA(800 x 600), XGA(1.024 x 768) Numb | | 1GB or more for Windows Vista or Windows 7 | | |
| env | Free disk space | 100MB or more | | |
| iron | Drive equipment | CD-ROM drive | | |
| | | Support one of following resolutions; VGA (640 x 480), SVGA(800 x 600), XGA(1,024 x 768) Number of col- ors: Either of 16 bit (65,536 color 24/32 bit (16.77 million colors)) | | |
| | Network card | The computer must provide a 10Base-T or 100Base-TX network card. | | |
| Web Browser* | | Internet Explorer version 6.0, 7.0 or 8.0 Netscape Navigator version 7.1 or 9.0 Safari 3.1 * Used to control and set up the projector. The layout of pages in the browser may slightly differ from each type of application or operating system you use. | | |
| Rec Mai | ommended Internet ler* | Microsoft Outlook Microsoft Outlook Express Netscape Mail Required the internet e-mail application software to receive an e-mail alert sent from this projector. If you do not use the func- tion E-mail Alert, this application is not required. | | |

Network specifications of the projector

LAN Terminal

| Data communication standards | 100Base-TX (100Mbps)/10Base-T (10Mbps) |
|------------------------------|--|
| Protocol | TCP/IP |

Cabling Between the Projector and a Hub or computer*1

Use an appropriate cable when connecting the projector and a hub or computer.

| Connection | Ethernet cable type | Max. cable length |
|----------------------|--|-------------------|
| Projector - Hub | STP straight-through category 5 *2 cable | 100m (328feet) |
| Projector - Computer | STP crossover category 5*2 cable | 100m (328feet) |

*1 There may be other limitations depending on your network environment or LAN specification. Please consult your network administrator for further details.

*2 Cable category indicates cable quality.

Notice

Expression/Abbreviation

The OS of the computer and the Web browser described in this manual are Windows XP Professional and Internet Explorer 6.0. In case of another OS or Web browser, some instruction procedures may differ from the actual operation depending on your computer environment.

Use of this manual

This manual does not provide the detailed description of basic operation and functions for computer, web browser, projector and network. For instructions about each piece of equipment or application software, please refer to the respective manual.

Trademarks

Ethernet is a registered trademark of Xerox Corporation. Microsoft, Windows, Windows NT, Windows XP, Windows Vista and Windows 7 are registered trademarks of Microsoft Corporation in the United States and other countries. Internet Explorer is a registered trademark of Microsoft Corporation. Netscape Navigator and Netscape Communicator are trademarks or registered trademarks of Netscape Communications Corporation. JavaScript is a registered trademark of Sun Microsystems, Inc.

Macintosh is a registered trademark of Apple, Inc. in the USA and other countries. PowerPC is a registered trademark of IBM Corporation. Intel Core is a registered trademark of Intel Corporation in the USA and other countries.

Other product or brand names in this manual are registered trademarks or trademarks of their respective owners.

* Unauthorized use of a part or whole of the contents in this manual is prohibited.

* The contents of this manual are subject to change without notice.

Flow of installation

To use the projector via the networks, follow the setup procedures below.

STEP 1 Connect the LAN and set the configuration.

- Decide depending on the LAN environment.
 - → "2. Setup Procedures" (pp.11–16).
- Detailed LAN configurations need to be done with a browser later.
- First, complete the Wired LAN connection between computers and projec
 - tors, then start browser configurations.
 - \rightarrow "3. Basic setting and operation" (pp.17–30).

STEP 2 Network Configuration has completed.

Follow each chapter to operate the projector.

- Operate and manage the projector → "4. Controlling the projector" (pp.31-44)
 - → "Power Control and status check" (p.32)
 - → "Control" (pp.34-37)
 - → "PC adjustment" (p.38)
 - → "Setting up the projector" (pp.39-42)
 - → "Projector information" (pp.43-44)

Chapter 2 Setup Procedures

2

Describes how to configure the network.

Setting procedures and contents differ depending on the LAN installation location. When installing, consult your system administrator to set up the LAN appropriately.

Connecting to the LAN line

Connect the LAN cable to the LAN connection terminal of the projector.

* Please use a shielded LAN cable.

Network configuration

Set the Wired LAN network through the projector menu. Detailed network settings will be made with browser. Refer to "3. Basic setting and operation" (p.17-30). First, complete the settings described in this chapter before performing steps in "3. Basic setting and operation."

Setting Procedure

- 1. Select "Network" in the Network menu, and press Point ▶ or **SELECT** button.
- 2. Select "On" with the Point ▲▼ buttons, and the press SELECT button. Then the Menu will disappear, the "Please wait..." message will appear, and switching operation will start. Switching will take a while and the projector's LINK/ACT Lamp will be on or blink, and after completing the operation, the "Please wait..." message will disappear.

3. Select "Network setting" in the Network menu and press **SELECT** button, and then the LAN setting screen will appear and selected LAN settings will be displayed. Adjust each item to the setting environment. Consult your system administrator about the detailed settings.

Press **SELECT** button in a row where you want to adjust, and adjust the figures with the Point \blacktriangle buttons and move among the items with the Point \blacklozenge buttons, and then press **SELECT** button to fix. Move to the next row with the Point \blacktriangle buttons to adjust.

4. After completing all the settings, select "Set" and press **SELECT** button. Now, all procedures have been done. To cancel the adjusted settings, select "Cancel" and press **SELECT** button.

You can confirm the LAN settings you have made from "Network information" (p.14). In such cases that the LAN cannot be connected, see this screen.

* The numerical value is a setting example.

| ltem | Description |
|------------|---|
| DHCP | "Sets DHCP function On or Off. When you setup the network setting manually, select |
| | "Off". When it is set On, IP address, Subnet, Gateway and DNS are automatically set according to your network environment *1. |
| IP address | Sets IP address of the projector |
| Subnet | Sets Subnet mask. Normally sets 255.255.255.0 |
| Gateway*2 | Sets IP address of the default gateway (Router) |
| DNS*3 | Sets IP address of the DNS server. |

*1 Set "On" only when the DHCP server is available on your network environment.

*2 Set [255.255.255.255] if the network does not provide the gateway (router).

*3 Set [255.255.255.255] if you do not use the function E-mail alert.

Network PIN code

The Network PIN code is to restrict the access to the projector through the network. After setting the Network PIN code, you need to enter it to operate the projector via the networks.

- 1. Select "Network PIN code" in the Network menu, and press **SELECT** button.
- The Network PIN code screen will appear.
- 2. Set the Network PIN code.

Set the figures with the Point \blacktriangle buttons and move to the next items with the Point \blacktriangleleft buttons. Select "Set" and press **SELECT** button to set. To cancel the preset Network PIN code, select "Cancel". When you do not want to set the Network PIN code, set "0000". It is recommended to set the Network PIN code if you use the projector via the networks. The Network PIN code can be set also through the networks. See "3. Basic setting and operation" \rightarrow "Initial setting" \rightarrow "Network PIN code setting" (p.23).

Network information

Select "Network information" in the Network menu and press Point ▶ or **SELECT** button to show LAN setting environment of the currently selected projector. (The description below is an example and different from what will be shown.)

* The numerical value is a setting example.

OK ? Yes No

DEN Exit

हिंगी Select

Network factory default

- 1. Select "Network factory default" in the Network menu and press **SELECT** button.
- 2. A confirmation box appears and select "Yes" and then press **SELECT** button.
- 3. Another confirmation box appears and select "Yes" and then press **SELECT** button.
- 4. All the wired LAN settings will go back to the factory default settings. For details, refer to "Wired LAN factory default settings" as shown in the table below.

Wired LAN factory default settings

| Parameter | Settings |
|-----------------|-----------------|
| DHCP | Off |
| IP ADDRESS | 169.254.100.100 |
| SUBNET MASK | 255.255.0.0 |
| GATEWAY ADDRESS | 255.255.255.255 |
| DNS ADDRESS | 255.255.255.255 |

3

Chapter 3

Basic Setting and Operation

Describes basic operations and settings for controlling the projector by using the web browser. It is required that computer and projector is connected to the network and the network address is properly configured.

Login the setting page of the projector

[1] Enter the IP address

Launch the web browser installed in your computer, enter the IP address into the "Address" on the browser and then press "Enter" key.

Enter the address that you configured in item "Network configuration" (rs p.12).

* The numerical value is a setting example.

[2] Login

If the setting page has set the password, the authentication window will appear. In this case type "user" onto the **User Name** text area and the login Network PIN code onto the **Password** text area and then click **OK (Log in)** button.

* The entering User Name must be "user" and it can not be changed.

[Note]

When accessing the projector for the first time or the Network PIN code "0000" is set, the auto-login will be performed and the next main setting page is displayed.

Check box setting

Select items by ticking on check boxes.

E-mail setting Option

- ☑ When PJ lamp is off.
- When PJ lamp replacement time is reached.
- ☑ When PJ needs service.
- ☑When internal PJ temperature is too high.
- When PJ is turned into Standby in proper user operation.
- When Power management function turns PJ lamp off.
- When Shutter management function turns PJ lamp off.

Initial setting

After installing the projector, perform the following basic initial setting. Click **Initial Setting** on the main menu to display the initial setting page.

| | Initial setting | | |
|------------------|--|----------------|-----|
| Initial setting | Language | English 👻 | Set |
| 🕼 Power & Status | Model name | ZM5000 | |
| | SERIAL NO. | 60X01234 | |
| 🗊 PC Adj. | Network PIN code | | Set |
| 🚯 Control | Temperature | Centigrade 😽 😪 | Set |
| Control | PJLink | OFF 🗸 | |
| 🛛 🐼 Setting | Password | | Set |
| E-mail setting | Ver. 1.000 | | |
| Network | ele sa constas a constas a constas a constas | | |
| - 🕞 Information | | | |
| SNMP setting | | | |
| | | | |
| | | | |

* The serial number in the figure is used for an example.

| ltem | Description |
|------------------|--|
| Language | Switches display language on the setting page. (Japanese, English) |
| Model name | Indicates the model name of the projector |
| SERIAL NO. | Indicates the serial number of the projector |
| Network PIN code | Sets the Network PIN code to login the setting page (🖙 p.23) |
| Temperature | Switches display temperature unit. (Centigrade, Fahrenheit) |
| PJLink | Switches PJLink password authentication. (ON, OFF) (🖙 p.23) |
| | Password for PJLink function (🖙 p.23) |

Network PIN code setting

This is to set the Network PIN code to restrict the access from an unauthorized person through the network.

Enter a 4-digit number as the Network PIN code onto the text box and click **Set** button.

The projector begins restarting and it takes

| Language | English | Set |
|------------------|----------------|------|
| Model name | ZM5000 | |
| SERIAL NO. | 60X01234 | |
| Network PIN code | 1234 | Set. |
| Temperature | Centigrade 🛛 🖌 | Set |
| PJLink | OFF | |

about 10 seconds. Close (Quit) the web browser and access to the login page again in 10 seconds. This is to perform the login authentication firmly.

The default Network PIN code [0000] means no Network PIN code is set.

When you connect the projector to the network, it is recommended to set a new Network PIN code. Only a four-digit number is valid for the Network PIN code.

PJLink and password setting

This is to set the PJLink password authentication on or off. If set "ON" with the PJLink pulldown menu, the password must be required. Enter a **password*** onto the text box and click **Set** button.

| Initial setting | | |
|------------------|--------------|-----|
| Language | English 🗸 🗸 | Set |
| Model name | ZM5000 | |
| SERIAL NO. | 60X01234 | |
| Network PIN code | 1234 | Set |
| Temperature | Centigrade 👻 | Set |
| PJLink | OFF 🗸 | |
| Password | 4321 | Set |

I to 32 alphanumeric characters can be used for the password.

What's PJLink?

The projectors equipped with PJLink function can be used together on the same network, regardless of model or brand, for centralized control and monitoring. This standard was established by the Japan Business Machine and Information System Industries Association (JBMIA). Please visit the Website at http://pjlink.jbmia.or.jp/english/.

PJLink Notice

The projector is compliant with PJLink Standard Class 1 of JBMIA, and it supports all commands defined by PJLink Class 1 and is verified conformance with PJLink Standard Class 1.

| Projector Input | | PJLink Input | Parameter |
|-----------------|------------------|--------------|-----------|
| Input 1 | RGB (PC analog) | RGB 1 | 11 |

| | Y, Pb/Cb, Pr/Cr | VIDEO 4 | 24 |
| | S-video | VIDEO 5 | 25 |
| Input 4 | NETWORK | NETWORK 1 | 51 |

Network configuration

Click **Network** on the main menu. The following setting page is displayed. The IP Address, Subnet Mask, Default Gateway, DNS (Domain Name Server) and projector name are set up on this menu.

The IP address and Subnet Mask have been configured already in chapter "Installation". If you want to change them or configure default gateway or DNS, perform them in this page. If you change them, the projector begins restarting and it takes about 10 seconds. Close (Quit) the web browser and access to the login page again in 10 seconds.

| Initial setting | Network setting DHCP | OFF Y | |
|------------------|----------------------------|--------------------------------|-----|
| 🐻 Power & Status | IP address Subnet mask | 172.21.99.253 255.255.255.0 | |
| 💽 PC Adj. | Default gateway DNS | 172.21.99.1 172.21.1.53 | |
| Gentrol | | Set | |
| Setting | Projector name | | Set |
| E-mail setting | | | |
| . Network | gancostancostancostancosta | | |
| Information | | | |
| SNMP setting | | | |
| | | | |
| | | | |

* The numerical value is a setting example.

| Item | Description |
|-------------------|---|
| DHCP | Sets DHCP configuration (ON/OFF). |
| IP address | Sets IP address of the projector |
| Subnet mask | Sets Subnet mask. Normally sets 255.255.255.0 |
| Default gateway*1 | Sets IP address of the default gateway (Router) |
| | Sats IP address of the DNS server. Must be set when using the e-mail function |

DNS^{*2}......Sets IP address of the DNS server. Must be set when using the e-mail function

Projector name^{*3}. Sets name of the projector. (64 characters maximum)

You must use the number specified by your administrator. The address must be entered as a group with four numbers split by a dot like [192.168.001.101].

^{*1} Set [0.0.0.0] if the network does not provide the gateway (router).

^{*2} Set [0.0.0.0] if you do not use the function E-Mail alert.

^{*3} If you use the DNS server, register the host name registered to the DNS server as a projector name. You can access with this projector name from any computers in your network. If you do not use the DNS server, access with the assigned IP address to the projector.

^{*} All the network setting will reset to the default when setting [0.0.0.0] of the IP Address.

^{*} If you make incorrect settings, you cannot find out the new network settings. Be careful to set up them correctly, otherwise you cannot connect to the projector. It is recommended to make a note of them.

E-mail setting

This projector has an E-mail function which can send an alert message to users or an administrator if it detects an abnormality on the projector or run out of the life span of the lamp. Click **E-mail Setting** on the main

menu and follow the below steps.

| lnitial setting | SMTP server | smtp.abc.xxx.com | 1 | Set | |
|------------------|-----------------------|------------------|----|-----|-----------|
| 🔝 Power & Status | SMTP server port | 25 | | Set | - |
| | Administrator address | admin@abc.xxx.co | om | Set | |
| 🗊 PC Adj. | Add address | | | Set | |
| 👵 Control | SMTP Authentica | tion setting | | | |
| 🔊 Setting | Auth | OFF | * | Set | |
| Cotting | SMTP Auth | CRAM-MD5 | ~ | Set | |
| E-mail setting | User ID | | | Set | ******** |
| Network | Password | **** | | Set | |
| Network | POP server | | | Set | 10.16.001 |
| 🐻 Information | POP server port | 110 | | Set | 10000 |
| SNMP setting | <u>Check/Delete</u> | | | | |
| | Option | | | | |
| | | | | | |

| ltem | Description |
|------------------------|--|
| SMTP server | Enter server name or IP address of the SMTP server. (up to 60 characters) |
| SMTP server port | Enter Port number of the SMTP server. (from 1 to 65535) |
| Administrator address. | Enter e-mail address of administrator. |
| Add address | Enter e-mail address of the user to send mail when the projector has an abnormality. |

SMTP Authentication setting

| Auth | Sets authentication setting option. (OFF, SMTP Auth, POP before SMTP) |
|-----------------|---|
| SMTP Auth | Sets user authentication setting option when selecting "SMTP Auth" in above |
| | column. (CRAM-MD5, LOGIN, PLAIN) |
| User ID | Enter SMTP user ID. (up to 63 characters) |
| Password | Enter SMTP password. (up to 63 characters) |
| | |
| POP server | Enter server name or IP address of the POP server. (up to 60 characters) |
| DOD convor port | Enter Port number of the POP conver (from $1 \neq 6 \in 5 = 5$) |

POP server portEnter Port number of the POP server. (from 1 to 65535)

1 Setting SMTP server and administrator address

Enter the server name or IP address of the SMTP server*¹, the port number of the SMTP server and administrator address and click **Set** button. The administrator address is set to "Reply-To" address of the message sent from the projector.

| E-mail setting | |
|-----------------------|-----------------------|
| SMTP server | your_smtpserver |
| SMTP server port | 25 Set |
| Administrator address | admin@abc.xxx.com Set |
| Add address | Set |
| | |

*1 The SMTP server is a server for sending e-mail. Please contact your network administrator to have this SMTP server address.

2 Registering and deleting E-mail addresses

Enter the e-mail address onto "Add e-mail address" and click **Set** button.

To check the registered addresses, click **Check/Delete** sub menu tab. The addresses are listed as the figure on the right.

Up to 10 E-mail addresses can be registered.

To delete the registered addresses, check the address you want to delete and click **Delete** button.

3 Setting SMTP authentication

Set the SMTP authentication concerned and click **Set** button. Please contact your network administrator in details.

| SMTP Authentication setting | | | |
|-----------------------------|----------|-----|--|
| Auth | OFF | Set | |
| SMTP Auth | CRAM-MD5 | Set | |
| user ID | user | Set | |
| Password | **** | Set | |
| | | | |

If the projector sends an alert message due to the abnormality on the projector but the SMTP server is down in some other reason, the message will not be sent. In this case, the message "Unable to connect to server." will be displayed on the setting page. To clear this message, set up SMTP server address again.

- You cannot use this E-mail function if the DNS server and SMTP server cannot be used in your network environment.
- The projector does not send message to the address set in "Administrator address" text box. If you want to send e-mails to the administrator address, enter the administrator address into "Add address" text box.

| E-mail setting | | |
|-----------------------|-------------------|-----|
| SMTP server | your_smtpserver | Set |
| SMTP server port | 25 | Set |
| Administrator address | admin@abc.xxx.com | Set |
| Add address | user5@abc.xxx.com | Set |

Check / Delete

4 Setting POP server

When "POP before SMTP" is selected at "Auth" of "SMTP Authentication setting", enter "POP server*2" and "POP server port" and click **Set** button.

| your_popserver | Set |
|----------------|-----|
| 110 | Set |
| 110 | Set |
| | |
| | |
| | |

*2 The POP server is a server for receiving e-mail.

Please contact your network administrator to have this POP server address.

Error message for sending alert mail

When the projector has an abnormality, an alert message will be sent to the registered E-mail address.

If the SMTP server is missing or the authentication is not completed because of input error in E-mail address setting or SMTP authentication setting when sending alert e-mail, the error message will be displayed. Please check the respective settings.

5 Option selection for sending alert mail

Click **Option** sub menu tab. Check the condition items under which alert mail will be sent and click **Set** button.

Please refer to item "Examples :Type and contents of alert mail" described on the next page.

"When PJ lamp is off" signifies the lamp goes out without user operation. "When PJ is turned into Standby in proper user operation" signifies that the projector is turned on by using the web browser and then it is turned into standby with ON/STANDBY button on the side control or the remote control.

✓ Up to 99,999 hours can be set for use time.

Examples: Type and contents of alert mail

When the projector has an abnormality, the following alert messages are sent to the registered E-mail address according to your selected condition. Administrator or user can take an efficient action quickly by receiving this message. This is very useful to maintain and service the projector.

The following are examples of received messages.

• When internal PJ temperature is too high:

| TITLE: Message from projector Projector Model Name: <i>model name</i> TCP/IP: 192.168.1.201 Projector Name: Proj05 |
|--|
| It sends you following message. |
| * The projector lamp is turned off because internal temperature goes over the safety limit. Wait for the completion of the cooling process and make sure the projector has been turned into Standby. Then turn the projector on again. If the Indicator continues flashing, check the air filter for dust accumulation. |

When PJ needs service:

| | om projector Name: <i>model name</i> .201 Projector Name: Proj05 | | |
|--------------------|--|--|--|
| It sends you follo | It sends you following message. | | |
| | quirement from Projector is detected. tatus of projector and consult with the dealer. OK NG | | |

The projector lamp was turned off, because the projector power circuit failed. Unplug the AC power cord and plug it, and then turn on the projector once again to verify operation. If the problem still persists, unplug the AC power cord and ask servicing to a qualified service personnel with the error information.

• When PJ lamp replacement time is reached:

TITLE: Message from projector Projector Model Name: *model name* TCP/IP: 192.168.1.201 Projector Name: Proj05

It sends you following message.

*The projector lamp has reached replacement time. Lamp ON 2000 h

Replace it with a new lamp immediately and reset the lamp counter. If the projector is used without resetting the lamp counter, the alert mail is sent to users in every poweron of the projector. This alert mail will not be sent when unchecking the mail sending condition "When PJ lamp replacement time is reached".

SNMP setting

This projector provides a SNMP (Simple Network Management Protocol) agent function. The SNMP consists of a manager and agents. The group which communicates information each other with SNMP is called

"Community". There are two access modes in a community, Refer (read only) and Set (readwrite). This projector allows to use Refer (read only) only. The SNMP message informs the projector status called "Trap" to an administrator. Click **SNMP Setting** on the main menu and set up each item.

| Initial setting | SNMP setting PJ information | | |

"When PJ lamp is off" signifies the lamp goes out without user operation. "When PJ is turned into Standby in proper user operation" signifies that the projector is turned on by using the web browser and then it is turned into standby with ON/STANDBY button on the side control or the remote control.

Up to 99,999 hours can be set for the time setting.

Chapter 4 Controlling the Projector

Describes controlling and setting of the projector by using the web browser.

Power control and status check

Click **Power & Status** on the main menu. The control page will be displayed.

By clicking **ON** or **Standby** button on the page, the power of the projector can be controlled.

Warning temperature icon

| External temp. A 🛕 99.9 °C | | PJ temp. | |
|----------------------------|-----------------|------------------|---|

| OK Cancel |

Item Description

PJ status

| Power | Displays the status of the lamp. (ON, OFF, On starting up, On cooling down, |
|---------------|---|
| | Service in need) |
| Status | .Displays the status of the projector's power. (Refer to next page.) |
| Power control | .Controls the projector power by clicking the "ON" or "Standby" button. |
| | |

PJ temp.

External temp. A..Displays the surrounding temperature of the intake vent.

Inside temp. ADisplays the surrounding temperature of lamp in the projector.

Inside temp. B Displays the surrounding temperature of panel in the projector.

* The warning icon will appear if the temperature exceeds a specified value. Check if there is no object to obstruct the airflow around the intake or exhaust vent. It might be airfilter clogged. Replace the airfilter with new one.

* The temperature unit can be set either Centigrade or Fahrenheit in the item "Initial Setting". (#@p.22)

 $\ensuremath{\mathscr{D}}$ The projector cannot be turned on while the projector is on cooling down.

The web browser checks and updates the projector's condition every 30 seconds automatically.

About projector condition

| Status | Description |
|-------------------------------|--|
| Normal | Projector is operating normally. |
| Power management in operation | Power management is operating |
| Lamp failure | Lamp failure is occurring |
| Abnormal temperature | The temperature of the projector became too high |
| Standby after Abnormal Temp | Projector detects abnormal temp. and sets into standby mode. |
| Power failure | Power failure has occurred inside the projector. Projector is turned |
| | off. Unplug the AC cord and ask servicing to a qualified service |
| | personnel. |

When a security (PIN code lock) has been set on the projector, you also cannot control it through the network. To control the projector through the network temporarily, execute "PJ lock suspend" command to unlock the security. "PJ lock suspend" is on setting sub menu [2] on Setting main menu. (INP.41)

Caution about turning on/off the projector via the networks

When turning on/off the projector via the networks, preset the projector as follows:

1. Select "Setting" from the Projector menu.

2. Select "Standby mode" from the Setting menu and set it as "Network".

If you set this function as "Network", the network part of the projector is constantly provided with power even if the projector is turned off. If you set this as Eco, then the network part will be turned off when you turn off the projector. Consequently, you cannot turn on/off the projector via the networks.

Control

Click **Control** on the main menu. The setting method differs depending on the contents of the page. Click on the page number to change pages and select desired setting items.

Please see the owner's manual of the projector to have the further information of each control item.

- The control page displays valid control items depending on the selected input mode, signal or functions of the projector you use, therefore, there may be different controls between the described items and actual control items on the page display. For further information, refer to the projector's owner's manual.
- When the projector is in standby, all the controlling items are inactive.

System

This function is to select the system of signal input to the projector. The available system mode are listed on the pull-down menu button according to the input signal. Select a system and then click **Set** button.

| <u>ojocon</u> | / <u>Sound</u> / <u>Image adj.</u> |

Chapter 5 Appendix

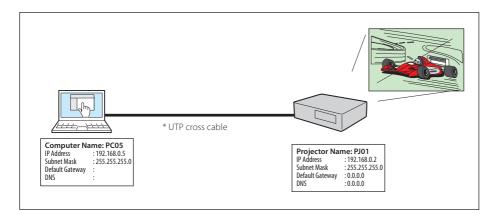

5

Connection examples Use of telnet Web browser setting Q & A

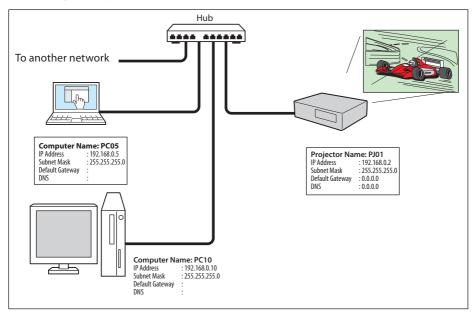

Examples of connection

Peer-To-Peer connection

Connecting the projector (PJ01) to the control computer (PC05) directly.

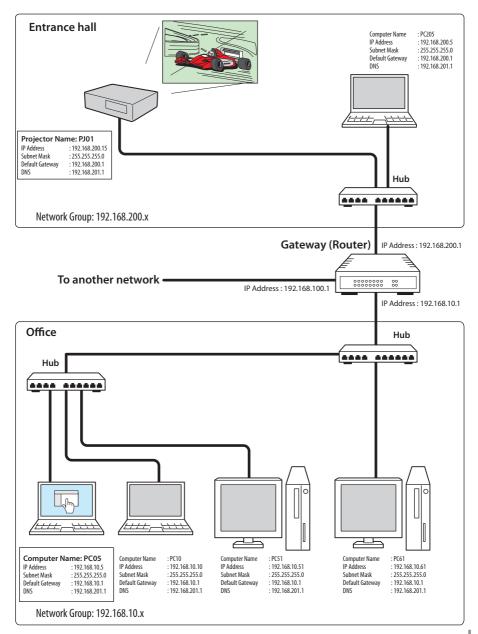

Connecting the projector (PJ01) to the control computer (PC05) via the hub.

When the projector is connected to the computer directly without hub, the UTP cross cable should be used.

The gateway (Router) installed in the network

Connecting the projector (PJ01) to the control computer (PC05) via the gateway.

Use of telnet

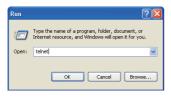

You can control the projector by using the telnet application^{*1} installed on your computer. Normally, the telnet application is available on your computer.

* The telnet 10000 port is used to control the projector.

Control

(For example, in case of using the telnet application of **Windows XP Professional**.)

1. Select **Run...** submenu from **Start** menu on the computer. Type "telnet" onto the **Open** text area on the displayed window and press **OK** button.

(For example, in case of using the telnet application of **Mac OS X v 10.4**)

1. Select **Terminal** from **Applications** -->Utilities.

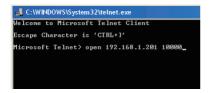

Type as below on the displayed window. > telnet [return]

2. The telnet application will start and the following window will be displayed. Type as below to connect the projector.

> open 192.168.1.201 10000 [return]

* Use the IP address assigned to the projector.

| 00 | Terminal — telnet — 80x24 |
|--------------------------|---------------------------|
| Last login: Tue Feb 26 1 | 5:59:02 on ttyp1 |
| Welcome to Darwin! | |
| Macintosh:~ gj\$ telnet | |
| telnet> open 172.21.99.2 | 51 10000 |
| Trying 172.21.99.251 | |
| Connected to 172.21.99.2 | 51. |
| Escape character is '^]' | |
| PASSWORD: | |

3. When communication is established correctly, the word "PASSWORD:" appears on the window. Type the login password (Network PIN code^{*2}) for the projector and then press "Enter" key on the keyboard. If you do not set up the Network PIN code, just press "Enter" key.

When the word "Hello" is replied, login has been succeeded.

* The password "1234" is used for the example.

- 4. Type the commands, refer to below table, to control the projector and then press "Enter" key for termination. For example, type "C00" which is a command to turn on the projector, and press "Enter" key. Confirm the projector is turning on.
 - * Enter with ASCII 64-byte capital characters and one-byte characters.

To disconnect the communication, press "Ctrl" key and "]" key at the same time, type "close" and then press "Enter" key on the Keyboard.

> close [return]

The table below shows the typical command lists for controlling this projector and please consult your local dealer for further information of another commands.

| Command | Function |
|---------|------------------|
| C00 | Power on |
| C02 | Power off |
| C09 | Volume up |
| COA | Volume down |
| COB | Audio Mute on |
| COC | Audio Mute off |
| C1C | Menu display on |
| C1D | Menu display off |
| | |

Command list table

*1 Further instructions about the telnet application, please see the on-line guide on your computer.

- *2 The password is a Network PIN code decided item "Network PIN code setting" (© pp.14, 23). If the authentication of the entered password is failed 4 times continuously, the communication will be disconnected automatically. Please try again for the connection.
- If the password or any command is not entered for more than 30 seconds, the communication will be disconnected automatically. Please try again for the connection.

Web browser setting

This projector is designed to be set up and controlled from an Internet web browser. Depending on the preference settings of the web browser, some control functions may not be available. Please make sure that the following functions are set up properly in the web browser.

Active Script/JavaScript enable

There are some control items used with the JavaScript function in the setting pages. If the web browser is set not to use this JavaScript function, it may not control the projector properly. In this case, the warning message "Make sure JavaScript is ON." will be displayed on the top of the page. To enable the JavaScript, please see further instructions on the next page.

Proxy setting

In some cases, your web browser is set up to use the proxy server for the internet or intranet connection. In this case, when you install this projector into the local network, you should set up the proxy setting of web browser preference correctly. Especially when connecting the projector and computer with a UTP cross cable directly, or when the network does not provide the proxy server, make sure that "not use proxy server" is set up in your web browser preference. Please see item "Examples: OS/Browsers" in the next page for further setting up procedure.

There are various ways to change your browser preferences depending on the version or applications. Please see the setting instructions on next page for example and also refer to on-line help of your web browser.

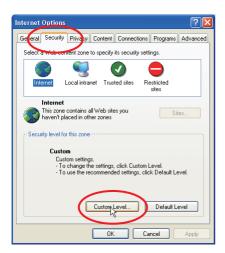

Examples: OS/Browsers

Windows XP Professional

Internet Explorer v.6.0

ActiveScript setting

Select **Internet Options** from **Tools** menu on the web browser and then select **Security** tab and click **Customize Level...** button. On the security setting window, scroll down and find the **Scripting** item, make sure that "Enable" is selected in item **Active Scripting**.

Proxy setting

Select **Internet Options** from **Tools** menu on the web browser and then select **Connection** tab and click **LAN Settings** button. Properly set up your web browser's the proxy server settings according to the local area network environment to which the projector is connected.

- Using proxy server

To use an external internet connection from the local area network, check the item **Use a proxy server** and enter the proxy server address and port correctly in the proxy settings window. For further instruction please consult your network administrator.

- Not using proxy server

Uncheck the item **Use a proxy server**.

If you connect the projector to the computer directly with UTP cross cable, this must be unchecked.

| Local Area Network (LAN) Settings Automatic configuration Automatic configuration may override manual settings. To ensure the use of manual settings, disable automatic configuration. Proxy setting

Select **Preference** from **Edit** menu on the web browser and then select the item **Advanced/ Proxies** in the **Category** column. Properly set up your web browser's the proxy server settings according to the local area network environment to which the projector is connected.

- Using proxy server

When you use an external internet connection from the local area network, select the item **Manual proxy configuration**. Enter the proxy server address and port number correctly on **HTTP Proxy** item. For further instruction please consult your network administrator.

Proxy setting

- **1** Open **Preferences...** from **Safari** menu on the web browser **Safari**. The preference menu appears.
- 2 Select Advanced icon and then click Proxies: Change Settings
- **3** Select **Proxies** tab and properly set up your web browser **Safari**'s the proxy server settings according to the local area network environment to which the projector is connected.

- Using proxy server

To use an external internet connection from the local area network, check the items **Web Proxy (HTTP) and Secure Web Proxy (HTTPS) of Select a proxy server to configure** window and enter the proxy server address and port correctly in **Web Proxy Server** window. For further instruction please consult your network administrator.

- Not using proxy server

Uncheck the items Web Proxy (HTTP) and Secure Web Proxy (HTTPS) of Select a proxy server to configure.

If you connect the projector to the computer directly with UTP cross cable, they must be unchecked.

Q&A

Α

Α

Installation/Access

Why doesn't the setting page appear in my web browser?

Following causes are possible. Please check them.

- 1. The projector does not connect to the network.
 - Check LED indicators status (138 p.12).
 - Check the connection of LAN cable if the LINK Lamp does not light green.
 - Check the network configuration of the projector if the ACT Lamp does not blink orange.
- 2. Wrong network configuration of the computer. Check the network configuration of the computer.
- 3. The proxy setting of the web browser is not set correctly (1987 p.52).
- 4. The computer does not provide TCP/IP protocol.

Q How can I restrict access from the computer.

- 1. Please use the password authentication function on the login page (187 p.23).
 - 2. Please use the IP filtering function provided with the gateway (router) to restrict the accessing from the computer. For further information please consult your network administrator.

Q Can I access the projector installed on the company's local area network from a remote location?

- A There are some ways to access to the projector in the LAN, but you must consult your network administrator for security reason.
 - Use of modem (Connect to the company's network from your home or some other places by using modem.)
 - Use of private line (Connect to the company's network from the branch office or maintenance office by using private line.)
 - Use of internet (Connect to the company's network from your home, branch office or some other places by using the internet.)

Q We use the DHCP/BOOTP server to assign the IP address. Is it possible to use the projector in this network environment?

A Possible. This projector supports the DHCP/BOOTP server. To use this projector in this network environment, set it up so that the DHCP/BOOTP server does not assign the IP address configured to this projector for another device on the network. Please consult your network administrator (187 pp.13, 24).

Q How can I install several projectors?

A Install and configure network one by one to avoid the IP address collision each other. To configure the IP address please see item "Network configuration" (PRP) pp.12-13, 24).

Password/Login

- **Q** What should I do when I forget the IP address of the projector?
- A You can check the IP address in the "Network information" menu.
- **Q** What should I do when I forget the password (Network PIN code)?
- A Please set the new network PIN code in the "Network PIN code" menu.

Q Can I register the setting page as a web browser "Favorites" or "Bookmarks"?

A Please add "Login" page to your "Favorites" or "Bookmarks". Do not add the specified setting page because it will not be able to perform the password authentication correctly.

Operation

Q Why can't be turned on/off with web browser?

A Please make sure the settings of the projector are correct to use the projector. Please set the Standby mode of the projector's Setting menu to "Network". Refer to "4. Controlling the Projector" → "Power control and status check" (I pp.32 - 33).

Q Why can't I change the controls in the setting page with web browser?

A Please make sure the projector is turned on. If it is in the standby mode, the setting is not effective to the projector. To control the projector with a web browser, the projector must be in the powered-on condition.

Q Why does it sometimes take a lot of time to complete the page display?

A The display speed of the page depends on the network environment in which both the projector and computer are placed. It may take much time to complete the page display if network traffic is heavy. Please consult your network administrator.

Q How many numbers of the E-mail address can I register in the E-mail setting page.

A You can register up to 10 addresses.

Why am I not receiving E-mail alert messages?

A Make sure that the registered E-mail address and SMTP server address are correct. If the SMTP server is located in your LAN (Local Area Network), the address should be set to the SMTP server in your LAN. The SMTP server located outside of your LAN may not be available for security reason. For further information please contact your network administrator (187 p.25).

Others

Α

Q What are the rules for IP address assignment?

If the network is constructed with TCP/IP protocol, a unique IP address is required for each piece of network equipment. The following are basic rules of the assignment.

Rule1

Do not configure the same IP address to the network equipment in the same network group. Each piece of equipment must be assigned a unique IP address.

If the IP address is set [192.168.x.x], the Subnet Mask should be set [255.255.255.0] for example.

Rule2

The start address [xxx.xxx.0] and the last address [xxx.xxx.255] of the IP address must not be assigned to any other equipment. These address numbers are reserved.

Rule3

The IP address must correlate to a network number. If network numbers are different between the equipment, they cannot establish communications each other. In this case, the router is placed in the networks to make the routing.

Q Can I control the projector by using the telnet application?

A Possible. Please refer to the item "Use of telnet" (187 p.48 - 49).

Q What is the MAC address assigned to the projector?

A The MAC address is displayed in "Network information" menu of the projector (ISP p.14) and in "Information" menu through the web browser (ISP p.43).

Q Can I update the firmware of the projector.

Α

It is possible to update the firmware through the network. It is required to have a special tool for the updating. For further information please consult your local dealer. The version number of the firmware is indicated on the lower part of the "Initial setting" page.

| | Initial setting | | | | | | |
