# Introduction to Easy Interactive Tools

See the information here to learn more about Easy Interactive Tools software.

[Easy Interactive Tools Features](#)

## Easy Interactive Tools Features

Easy Interactive Tools is an application that allows you to draw on projected images. By using your finger (on projectors that support finger touch operation) or the interactive pen supplied with a projector, or your computer mouse, a variety of interactive functions become available.

## Other Interactive Functions

You can also perform the following operations with Easy Interactive Tools:

- Operate the computer's mouse
- Control devices connected to a computer, such as a projector or document camera
- Edit content drawn on the projected screen

- Save the content you created
- Network teleconferencing

When you connect a projector to a computer over a network using EasyMP Multi PC Projection, you can share the projected screen with a remote location.

When used with Easy Interactive Tools, you can share annotations and drawings made on the projected screen with multiple locations.

For more information about EasyMP Multi PC Projection, visit the Epson Web site.

[Starting Easy Interactive Tools](#)

[Operating the Interactive Pen](#)

[Finger Touch Operations](#)

[Drawing Screens and Modes](#)

[Exiting Easy Interactive Tools](#)

## Starting Easy Interactive Tools

Make the following preparations before starting Easy Interactive Tools.

### When connecting a computer to the product with a USB cable:

- Connect the USB cable to the computer's USB port and the product's USB-B port.
- If you are using a document camera, connect the computer to your projector with an HDMI or VGA cable.
- Select the **Extended** menu settings from the projector's menu system. (Set **Pen mode** to **PC interactive**, or select the mouse mode icon on your screen.)

### When connecting a computer to a projector over a network:

- Configure the network settings so that the computer can connect to the network.
- Connect a wireless LAN module (if necessary) or a LAN cable so that the projector can connect to the network.
- Select the network settings from the projector's menu system.
- Install the EasyMP Multi PC Projection software for the projector.
- In EasyMP Multi PC Projection, open the Set options screen, select the **General settings** tab, and select **Use Easy Interactive Tools**.

**Note:** Some projector models require a USB cable for interactivity. For details, see the projector *User's Guide*.

1. Turn on the product and project images from the computer.

2. Start Easy Interactive Tools on the computer.

- **Windows Vista/Windows 7:** Click  or **Start > All Programs** or **Programs > EPSON Projector > Easy Interactive Tools Ver.X.XX.**
- **Windows 8/Windows 8.1:** Navigate to the **Apps** screen and select **Easy Interactive Tools Ver.X.XX.**
- **Windows 10:** Click  > **All Apps > Easy Interactive Tools Ver.X.XX.**
- **OS X:** From the Applications folder, double-click **Easy Interactive Tools Ver.X.XX.**

Easy Interactive Tools starts and the Home screen is displayed.

3. If you are using a document camera, click the  **Camera** button and use the application's toolbar to perform functions.

**Note:** If you start Easy Interactive Tools while playing a movie, the movie playback screen may turn black. Restart the application that is playing the movie.

**Parent topic:** [Using Easy Interactive Tools](#)

## Operating the Interactive Pen

You can use the interactive pen supplied with your projector to operate the Easy Interactive Tools software. The functions and shape of the interactive pen differ depending on the projector model it came with. For details, see your projector *User's Guide*.

1. Check that there is a battery in the interactive pen and then turn it on.
2. Press the pen tip button to the screen to select an icon.

3. Press and move the pen on the screen to draw.

### Note:

- You can use two interactive pens at the same time, if available for your projector model. However, you can only use one while connected to a network or while on a window displayed in Whiteboard mode. See your projector *User's Guide* for more information.
- You can operate Easy Interactive Tools with up to six devices at the same time (up to three devices with OS X), such as a mouse connected to a computer, interactive pens, and finger touch, depending on your projector model.

- The following operations can only be performed by one device:
  - Operations on the Home screen, Settings screen, Camera screen, Insert image screen, and Select background screen
  - Adjusting and editing identical shapes and images
  - Using menus
  - Entering text
  - Operations on a window displayed in Whiteboard mode

**Caution:** Do not hold the tip of the interactive pen or allow it to become cracked or dirty. Otherwise, the interactive pen may fail to operate.

**Parent topic:** [Using Easy Interactive Tools](#)

## Finger Touch Operations

On projectors that support finger touch operation, you can use your finger to perform the same functions as the interactive pen.

When performing finger touch operations, you can use two fingers for multi-touch operations such as enlarging or reducing the image. The projector recognizes up to six multi-touch points. When a group of people are performing finger touch operations, all members must use the same drawing tool.

**Parent topic:** [Using Easy Interactive Tools](#)

## Drawing Screens and Modes

Select drawing functions from the Command Bar and the Drawing Toolbar.

1	<b>Command Bar:</b> Allows you to change the mode, save files, control connected devices, and select a variety of settings.
2	<b>Drawing Toolbar:</b> Allows you to select the thickness and color of the pen lines, and add graphics or text to the drawing area.

In Easy Interactive Tools, you can select a drawing screen according to the environment in which you are using the projector. To enable annotating on a secondary display or extended desktop, click  >  on the command bar, and then select settings on the **Enlarge Screen** tab.

### Primary Display

You can project your computer's screen to draw on the projected screen.

### **Secondary Display (Extended Desktop)**

While displaying content on your computer screen, you can project different content from the projector. You can draw only on the projected screen.

**Note:** You must first configure your computer display settings for Secondary Display (Extended Desktop). See your computer documentation for more information.

Easy Interactive Tools provides two drawing modes. When you change the mode, the screen changes as shown below.

### **Use Multi-Projection**

You can project images from multiple projectors and draw across two of the projected screens.

### Annotation Mode

Allows you to draw on the image currently displayed on the computer. This is useful when you need to emphasize certain points or add notes. You can also draw on images from a document camera.

### Whiteboard Mode

Allows you to display and draw on a plain screen. You can treat the drawing area as a page and create multiple pages to draw on. You can also save your drawings as a file (using .eit file format) and open them again later.

## Drawing in Annotation Mode

You can draw on images projected from a computer's screen or document camera in Annotation mode.

1. Select **Desktop annotation** on the Home screen or  from the Command Bar.  
Annotation mode starts and the computer's screen is displayed.

**Note:** To draw on images from a document camera, select **Camera** on the Home screen or  from the Command Bar. The image from the document camera is displayed on the Camera screen.

2. Select  on the Drawing Toolbar.
3. Draw on the projected image.

**Note:** To change the color and thickness of the pen lines, select  next to  to display the pen palette. Once you have selected the color and thickness, select  to close the pen palette.

4. To erase drawings, select one of the following tools from the Drawing Toolbar:

-  allows you to use the interactive pen or your finger (if supported) as an eraser.
-  erases all of the current drawings.

5. To save the contents of your drawing, select  from the Command Bar.

You can save the displayed screen in .jpg, .bmp, .png, .pdf, or .eit format. You can select the save location, file name, and the file format on the **Save** tab on the Settings screen.

**Note:** If you open an .eit file on another computer that has a different display resolution, some parts of the drawings may not be displayed.

## Drawing in Whiteboard Mode

You can draw on a plain page in Whiteboard mode. You can add pages from the Command Bar and display a page list screen where you can perform additional page operations.

1. Select **New** on the Home screen or  from the Command Bar.

Whiteboard mode starts and a new page is displayed.

**Note:** To open a previously saved file, select **Open** on the Home screen or  from the Command Bar.

2. Select  on the Drawing Toolbar.
3. Draw on the page.

**Note:** To change the color and thickness of the pen lines, select  next to  to display the pen palette. Once you have selected the color and thickness, select  to close the pen palette.

4. To erase drawings, select one of the following tools from the Drawing Toolbar:

-  allows you to use the interactive pen or your finger (if supported) as an eraser.
-  erases all of the current drawings.

5. From the Command Bar you can add, delete, duplicate, or move pages.

-  : Displays thumbnail images of the available pages. Select a thumbnail image to change the displayed page. Drag and drop a thumbnail image to change the display order.
-  : Adds and displays a new page.
-  : Duplicates the currently displayed page.
-  : Deletes the currently displayed page.
-  : Moves the currently displayed page up by one position.

- : Moves the currently displayed page down by one position.

6. To save the contents of your drawing, select  from the Command Bar. (When you use full display in Whiteboard mode, use  to select **Save** or **Save As.**)

Saves all pages with drawings in .jpg, .bmp, .png, .pdf, or .eit format. If you want to edit a file again in the future, you must save it in .eit format.

**Note:**

- If you open an .eit file on another computer that has a different display resolution, some parts of the drawings may not be displayed.
- Saving in .jpg, .bmp, or .png format saves all pages by treating one page as one file. Saving in .pdf or .eit format saves all pages in one file.
- You can select the save location, file name, and the file format on the **Save** tab on the Settings screen.

**Changing Between Full Display and Window Display**

When you select  or  from the Command Bar in Whiteboard mode, you can switch the drawing screen between full display and window display.

**Note:** During window display, you can use only one finger (if supported) or one interactive pen, and operations outside the window become computer mouse operations.

**Parent topic:** [Drawing in Whiteboard Mode](#)

## Drawing Across Two Screens

You can draw across two screens when multiple projectors are connected to a computer.

**Note:** You need to install Easy Interactive Driver Ver.4.0 to draw across two screens. The multi-screen functions vary depending on the projector model. For details, see your projector *User's Guide*.

Before drawing across two screens, do the following:

- Connect an image signal cable such as a computer cable or an HDMI cable to your computer and the projectors.
- Connect the USB cable to the computer's USB port and the projector's USB-B port.
- In the projector's **Extended** menu, select **Easy Interactive Function > General > Advanced > Multi-Projection** and select the projector's installation position.

Check the following on your computer:

- The resolution for the primary display and the secondary display are the same.
- The primary display and the secondary display are displayed at the same height.

- The secondary display is placed on the right of the primary display.
  - Make sure **System Configuration > Mission Control > Operating space for each display** is set to **Off** (OS X only)
1. In Easy Interactive Tools, click  >  on the Command Bar.  
The Settings screen is displayed.
  2. On the **Enlarge Screen** tab, select **Use Multi-Projection** under **Use Screen Settings**.

# Solving Problems

If you have any problems while using Easy Interactive Tools, check for solutions here.

Problem	Solution
Characters appear garbled after changing the language.	Fonts for the selected language are not available in your operating system. Select <b>Restore Defaults</b> on the Settings screen to return to the default settings.
When two people use interactive pens, one of the pens does not operate.	You are performing one of the following tasks that allow only one interactive pen to be used: <ul style="list-style-type: none"><li>• In Whiteboard mode mouse operations, you are using window display.</li><li>• You are performing operations on the Home screen, Settings screen, Camera screen, Insert image screen or Select background screen.</li><li>• You are adjusting and editing identical shapes and images using the Drawing Toolbar.</li><li>• You are using menus.</li><li>• You are adding text.</li></ul>
You cannot draw on a Keynote slide presentation using OS X.	You cannot draw on Keynote slides in OS X.
Images do not display correctly in the Enlarge area.	You are performing one of the following disallowed operations: <ul style="list-style-type: none"><li>• With Windows Vista, you are using an application that requires the Microsoft DirectX function.</li><li>• You are displaying images from a DVD player.</li></ul>
You cannot save or print images from Windows Media Player.	You are performing one of the following disallowed operations: <ul style="list-style-type: none"><li>• You are using an application that requires the Microsoft DirectX function.</li><li>• You are displaying images from a DVD player.</li></ul>

Problem	Solution
When opening a .eit file, some of the drawings appear incorrectly.	<p>One of the following has occurred:</p> <ul style="list-style-type: none"> <li>• You have opened the .eit file on a computer with a different display resolution than the computer that originally saved the file. Match the file's display resolution for best results.</li> <li>• The .eit file may have been corrupted. Create the drawing and .eit file again.</li> </ul>
You cannot playback recorded movies correctly.	<p>For best results, use the following software to play movies recorded with these operating systems:</p> <ul style="list-style-type: none"> <li>• Windows: Use Windows Media Player.</li> <li>• OS X: Use QuickTime Player 7.7 or later.</li> </ul> <p>If you do not hear audio, the movie may have been recorded from an incompatible document camera.</p>
Drawings across two screens are cut off.	<p>Make sure you installed the Easy Interactive Driver Ver.4.0. (The installation environment of the projectors may also cause drawings to be cut off, so check the installation of your projectors.)</p>
