# Quick Setup

Before using the projector, make sure you read the safety instructions in the online *User's Guide*.

Connect the projector

Choose from the following connections. See the sections below or the online *User's Guide* for details and additional connection types.
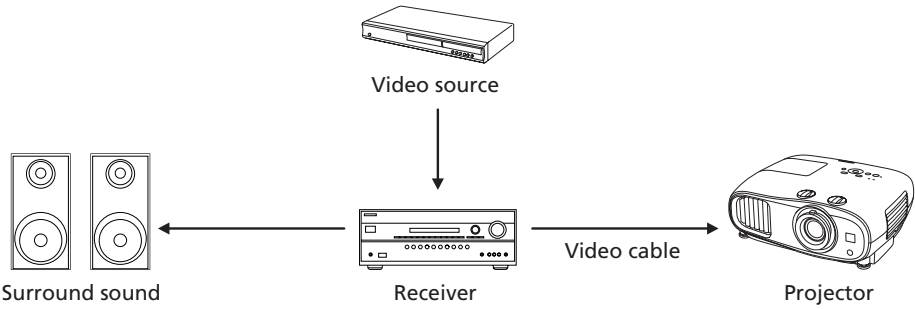

Video connection

Connect a video source that has a separate audio output to the projector.

HDMI cable

Audio connection

Connect your source's audio output to your home theater receiver or powered speakers.

Home theater system

Video source

Video cable

Surround sound   Receiver   Projector

Powered speakers

External speakers   Video source   Projector
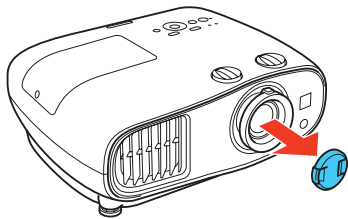

Video cable

Note: *See your home theater receiver documentation for more information on connections.*

## Turn on your equipment

1 Turn on your video source.

2 Plug in the projector.

**3** Remove the lens cap.

4 Press the ⏻ power button on the projector or the **On** button on the remote control. The power light flashes blue, then stays on.

Note: *To shut down the projector, press the ⏻ power button on the projector twice or the ⏻ **Standby** button on the remote control once. You don't have to wait for the projector to cool down.*

5 Use the arrow buttons on the remote control to highlight any of the options on the Home screen that appear, then press **Enter** to select it. You can switch between projection sources and quickly access various adjustment options from this screen.

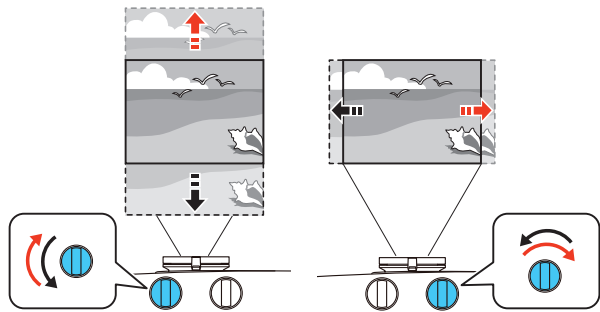

6 The default language of the menu system is English. To select another language, press the **Menu** button on the projector or remote control. Select **Extended** and press **Enter**. Select **Language** and press **Enter**. Select your language and press **Enter**. Press the **Menu** button to exit the menu system.
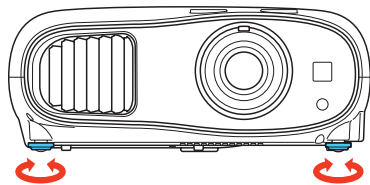

Adjust the image

1 If you don't see an image, press one of the Source buttons on the remote control or the **Home** and arrow buttons on the projector to select the image source.

**Note:** *If you still see a blank screen or have other display problems, see "Troubleshooting."*

2 For the best image quality, place the projector directly in front of the center of the screen, facing the screen squarely. If this is not possible, turn the horizontal and vertical lens shift dials to adjust the image position and center it on the screen.

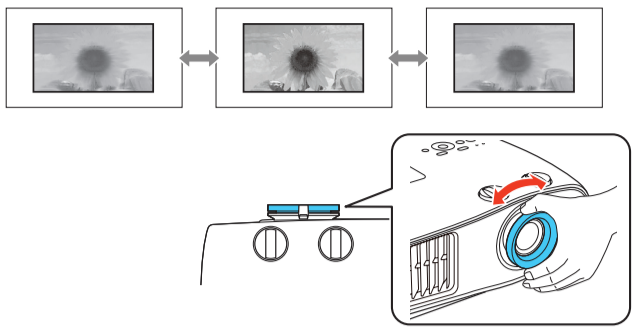

**3** If the image is tilted, adjust the front feet as shown below.

4 Turn the zoom ring to reduce or enlarge the image.

**5** Turn the focus ring to sharpen the image.

6 If your image is uneven on the sides, you can use the keystone correction feature to adjust the image. To use this feature, you must first set the lens to the center-top position using the lens shift dials.

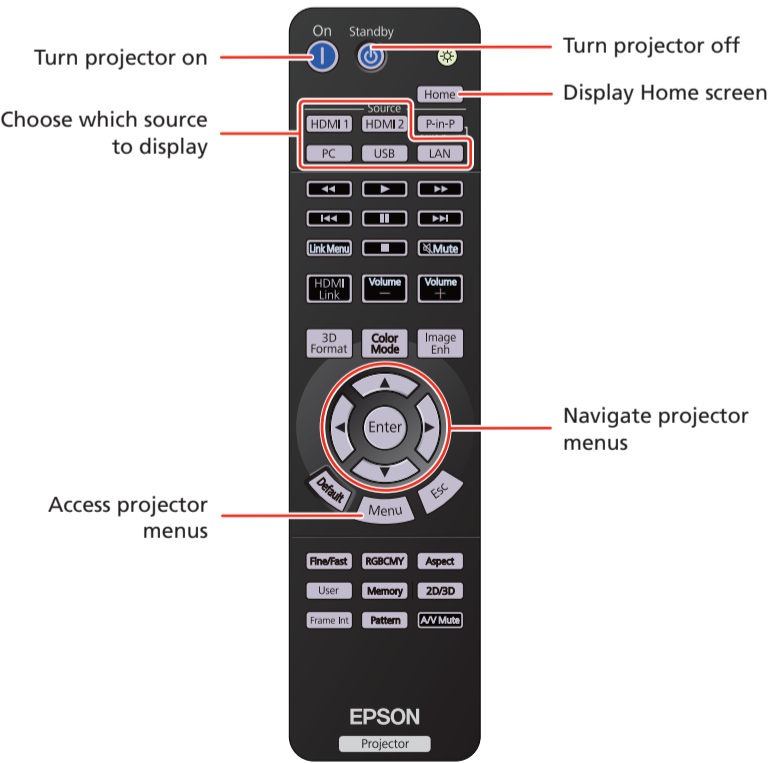

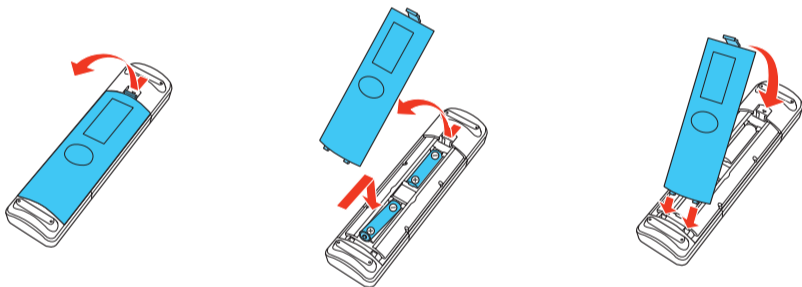

Press the ⬜ or ⬜ button to display the keystone correction screen. Then press the ⬜ or ⬜ button to correct for horizontal keystone distortion and the ⬜ or ⬜ button to correct for vertical keystone distortion.

Using the remote control

Make sure the batteries are installed as shown (two AA batteries).

Turn projector on
Choose which source to display
Access projector menus

Turn projector off
Display Home screen
Navigate projector menus

For more information on using the remote control, see the online *User's Guide*.
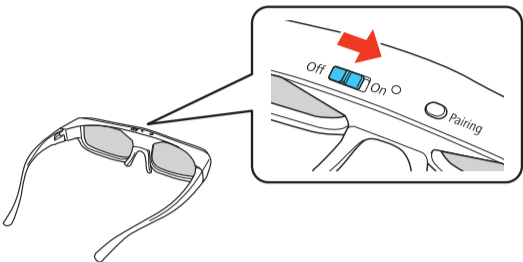

Viewing 3D images

To view 3D content, you must first connect a 3D-compatible video device to one of the HDMI ports on your projector. You will also need a pair of Epson® (part number V12H548006) or Epson-compatible RF 3D active shutter glasses.

**1** Turn on and begin playback on the 3D-compatible video device.

Note: *Make sure you set the video device to play content in 3D mode.*

2 Press the **3D Format** button on the remote control, if necessary.

3 Slide the power switch on your 3D glasses to the **On** position.

Note: *If the glasses don't automatically display 3D content, you may need to pair them with the projector. Move the glasses within 10 feet (3 m) of the projector, then press and hold the **Pairing** button on the 3D glasses for at least 3 seconds. The status light on the glasses will alternately flash green and red, then remain green for 10 seconds if pairing is successful.*

You can also automatically convert 2D HDMI content to 3D. To enable the 2D-to-3D Conversion option, press the **Menu** button on the projector or remote control. Select **Signal** and press **Enter**, then select **3D Setup** and press **Enter**. Select **2D-to-3D Conversion** and press **Enter**. Select the **Weak**, **Medium**, or **Strong** setting, then press **Enter**.

See the online *User's Guide* for more information on adjusting 3D images.

Troubleshooting

If you see a blank screen or the **No signal** message after turning on your video device or computer, check the following:

- Make sure the power light on the projector is blue and not flashing.

- Press one of the Source buttons on the remote control or the **Home** and arrow buttons on the projector to switch to the correct image source, if necessary.

- If you're using a Windows® laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labeled **CRT/LCD** or have an icon such as ⬚/⬚. You may have to hold down the **Fn** key while pressing it (such as **Fn** + **F7**). Wait a moment for the display to appear.

- If you're using a Mac laptop, open **System Preferences** and select **Displays**. Click the **Arrangement** tab and select the **Mirror Displays** checkbox.

If the keystone correction feature doesn't correct the image, make sure you first set the lens to the center-top position using the horizontal and vertical lens shift dials.

If 3D images aren't displaying properly, check the following:

- Make sure to wear the 3D glasses within 32 feet (10 m) of the projector.

- Check that your 3D glasses have not entered standby mode. Slide the power switch on the 3D glasses into the **Off** position, then back to the **On** position.

- Press the **Menu** button on your remote control, select the **Signal** menu, then **3D Setup**, then select **3D Display**. Make sure that the **3D** option is selected. You may also need to set the **Diagonal Screen Size** setting in the Signal menu. See the online *User's Guide* for more information.

- Check that your video device and media are both 3D-compatible. Refer to the documentation that came with your video device for more information.

Where to get help

Manuals

For more information about using the projector, click the icons on your desktop to access the online manuals (requires an Internet connection). If you don't see icon links to the manuals, you can install them from the projector CD or go to the Epson website, as described below.

Telephone support services

To use the Epson® PrivateLine® Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a support specialist by calling (562) 276-4394 (U.S.) or (905) 709-3839 (Canada).

Support hours are 6 AM to 8 PM, Pacific Time, Monday through Friday, and 7 AM to 4 PM, Pacific Time, Saturday. Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Internet support

Visit **www.epson.com/support** (U.S.) or **www.epson.ca/support** (Canada) for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson.

Registration

Register today to get product updates and exclusive offers. You can use the CD included with your projector or register online at **www.epson.com/webreg**.

Optional accessories

For a list of optional accessories, see the online *User's Guide*.

You can purchase RF 3D glasses (part number V12H548006) or other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at **www.epsonstore.com** (U.S. sales) or **www.epson.ca** (Canadian sales).

Notices

Bluetooth Safety and Specifications

Contains Bluetooth module model: DBUB-E207

This document provides safety instructions and describes the specifications. Read this document carefully before use to ensure your safety and product performance.

U.S.

FCC Notices

Contains FCC ID: BKMAE-E207

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This antenna of this device must not be co-located or used in conjunction with any other antenna or transmitter except in accordance with FCC multi-transmitter product procedures.

Properly shielded cables must be used for connections to LCD Projector in order to meet FCC emission limits. The cable for peripheral with a ferrite core must be used for RF interference suppression.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 7.9 inches (20 cm) between the radiator and your body.

Canada

Industry Canada (IC) Notices

Contains IC: 1052D-E207

This Class B digital apparatus complies with Canadian ICES-003.

CAN ICES-3(B)/NMB-3(B)

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

This device and its antennas(s) must not be co-located or operating in conjunction with any other antenna or transmitter except in accordance with IC multi-transmitter product procedures.

Radiation Exposure Statement:

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm (7.9 inches) between the radiator and your body.

This equipment is not permitted for use on aircraft or satellites.
